Three-phase photovoltaic containers used in chemical plants in Brunei

Overview

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

How will solar power power Hengyi's refinery & petrochemical complex?

This will be achieved through the installation of solar photovoltaic (PV) panels on building rooftops, car shed rooftops, and open spaces across 36 hectares of PMB. The project is designed primarily to provide energy to Hengyi's refinery and petrochemical complex.

Is PMB suitable for solar power?

The chairman added that preliminary analysis indicates PMB is highly suitable for harnessing solar power due to its abundant annual solar irradiance, earning a Grade A rating for Solar Energy Resource Richness. Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.
