What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

What is the absorption efficiency of ultra-broadband solar absorber based on columnar Ti?

The ultra-broadband solar absorber based on columnar Ti obtains an average absorption efficiency of 94.64 % in 280–3000 nm. The structure obtains an average absorption efficiency of 96.3 % at AM1.5. The bandwidth with an absorption efficiency greater than 90 % reaches 2382 nm.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
