

# Toronto Canada develops solar panels

## Overview

---

Could Toronto's energy needs be met with solar power?

More than half of Toronto's electricity needs could be met with solar power generated from rooftops and parking lots, according to a new report by the Ontario Clean Air Alliance.

How many solar panels are in Toronto?

The City of Toronto has already made progress, with over 100 solar arrays installed on city-owned buildings, generating nine MW of power. As part of its TransformTO Net Zero Strategy, Toronto aims to increase this capacity to 37 MW by 2030.

Where are Canadian solar panels made?

Likewise Canadian Solar has a pipeline of utility-scale power projects. With state-of-the-art manufacturing facilities in Canada. Including China and Vietnam, Canadian Solar employs more than 8,500 workers. Are you looking for the best solar panels in Canada?

.

Is solar a good idea in Toronto?

But solar is not always encouraged by the economic structures at play. Currently, solar system owners in Toronto — whether on buildings or parking lots — are compensated through net metering, which only offsets their electricity costs but doesn't pay for surplus clean energy sent to the grid.
