

# **Tuvalu Uninterruptible solar container power supply system**

## Overview

---

Does Tuvalu have solar power?

All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby. For the main island of Funafuti there are some solar PV systems tied to the grid with diesel base load generators.

How much energy does Tuvalu use a year?

Like many Small Island Developing States (SIDS), Tuvalu has been heavily reliant on imported fuel for its diesel-based power generation system. Through this new FSPV system 174.2 megawatts per hour of electricity will be generated each year, meeting two percent of Funafuti's annual energy demand.

How does Irena support Tuvalu?

Organizations like the International Renewable Energy Agency (IRENA) and the International Solar Alliance (ISA) further support Tuvalu by offering policy guidance, capacity-building programs, and access to a global network of renewable energy experts (IRENA, 2025; Testbook, 2024).

What challenges does Tuvalu face?

Tuvalu's geographic and economic context presents unique challenges for energy provision. The nation's dispersed islands, with Funafuti as the capital and most populated atoll, complicate energy distribution and infrastructure development.
