

# **U S Power Plant Energy Storage Procurement**

## Overview

---

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

How much energy storage capacity will US utilities add in 2024?

If all of the energy storage-related requests for proposal (RfPs), site applications, and other utility proposals that were active at the end of 2024 take shape, US utilities will add more than 18.5 GW of energy storage capacity. Energy storage has been a hot topic and growth sector in the sustainable energy space for years.

Which states will add more energy storage capacity in 2024?

If all of the RfPs, applications, and other utility proposals that were active at the end of 2024 materialize, utilities will add more than 18.5 GW of energy storage capacity in places including Arkansas, Louisiana, Georgia, Iowa, Indiana, Puerto Rico, Texas, Washington, and Wisconsin.

What are Illinois' energy storage procurement goals?

Lawmakers in Illinois introduced several bills in mid-2024 which included energy storage procurement targets. One pair of bills targets 7.5 GW by 2030 and a separate set would set the goal at 9 GW by 2030 and 15 GW by 2038.
