UPS requires several battery cabinets

Overview

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.

What is a UPS battery rack?

Regular load testing helps determine exact replacement timelines. A UPS battery rack is a structured framework designed to securely house and organize multiple batteries in Uninterruptible Power Supply (UPS) systems. These racks ensure optimal space utilization, cooling, and maintenance access, providing reliable backup power during outages.

Does unified power offer battery cabinets?

Unified Power offers a complete line of battery cabinets for both UPS and Telecom Applications. These cabinets can be configured to match OEM cabinets and offer a competitive option for system upgrades or new projects. Features Space saving foot print is the industry's most compact design.
