# **Uninterrupted power supply self-test for solar container communication stations**

## Overview

---

Can a remote base station power supply be uninterrupted?

By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed.

How does a solar power supply work?

Solar or power grid electricity powers the base station and charges the batteries, with solar having priority. Only when neither proves sufficient will the batteries be utilized. Huawei's PowerCube hybrid power supply solution has been widely recognized for its remote-station viability.

What is Huawei energy storage system & monitoring system?

The energy storage system can employ a variety of energy storage methods and temperature control modes to maximize energy utilization, while the monitoring system supports Huawei in-band & out-band GPRS/IP transmission through NetEco and M2000 on the back end. Dual power
