

# Uninterruptible Power Supply for Amsterdam Traffic

## Overview

---

What is an uninterruptible power supply?

Uninterruptible power supplies provide power to critical loads in the event of a power failure. Unlike emergency generators, UPS systems provide power immediately, but only for a short period of a few minutes - until a backup power supply comes online or until the load completes its shutdown sequence.

Why do people rely on uninterruptible power supplies in public transport networks?

Billions of people rely on uninterruptible power supplies in public transport networks every day to keep passengers safe and goods moving. AEG Power Solutions offers a full range of innovative and reliable power solutions that support all kinds of transportation infrastructure around the globe.

What is a 3-phase uninterruptible power supply (UPS)?

A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

How does a static ups work?

A static UPS operates on batteries that are activated instantly during a power outage. The batteries take over the power of the connected devices without interruption, ensuring that crucial business processes do not falter during a power outage. UPS systems each deliver a certain amount of VA (or MegaVA).

## Uninterruptible Power Supply for Amsterdam Traffic

---

### Uninterruptible Power Supply for Traffic

Jan 27, 2023 · Keep your intelligent traffic system operating with an uninterruptible power supply! AM Signal is a leading distributor of intelligent traffic. Learn more.

---

### Uninterruptible Power Supply (UPS)

Explore a range of 3-phase UPS systems that deliver high availability and reliability with modular UPS and lithium-ion battery options. High-efficiency, fully integrated, and end-to-end ...

---

### Transportation

Railways and Metros UPS systems are vital to ensuring uninterruptible power to crucial rail infrastructure like traffic control systems, trackside traffic lights, track points and axle counter ...
