

# Uninterruptible power supply for Togo electricity

## Overview

---

Can Togo achieve universal access to electricity?

Demand for electricity in Togo has increased rapidly in line with economic growth, but energy production capacity remains insufficient to trigger structural transformation and private sector development. The progress made and the favourable outlook should help to achieve universal access to electricity, which the authorities have set for 2030.

How much energy does Togo use?

In total, electricity supply of 1.162 GWh is thus achieved through distribution losses, resulting in a final electricity consumption of 876 GWh. Togo's total energy consumption is divided into three sectors. The largest share, 76%, is in the use of biomass, followed by petroleum products 20%. Only 4% of energy is used in the form of electricity.

Why is access to electricity important in Togo?

Togo recognizes that access to electricity is an essential element of its economic development and inclusive growth policy and is one of the major pillars that will enable the implementation of its new National Development Plan. Togo's ambition is to ensure universal access for all Togolese by 2030, with a 100% access rate over the next ten years.

Will Togo bring electricity to 8 million people by 2030?

This is part of Togo's strategy to bring access to electricity to 8 million people by 2030. ↑ Togo, Konsulat. 2020. Konsulat Togo.
