# Ups two-hour uninterruptible power supply cabinet

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

What is a UPS and how does it work?

A UPS (Uninterruptible Power Supply) system ensures that your devices continue to operate in the event of a power disruption or outage. It does this by providing power from the energy stored in the batteries in the battery cabinet. The UPS system can be equipped with lithium-ion batteries, offering up to 34.6 kWh of energy and can support up to 5 MW of power.

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.
