Uzbekistan mobile power station generator

Overview

How many hydropower stations will Uzbekistan build in 2025?

Specifically, during 2025–2026, Uzbekistan plans to build 2,983 micro hydropower stations with a combined capacity of 167 megawatts. These projects are expected to generate 500 million kilowatt-hours of clean electricity and save 151 million cubic meters of natural gas.

How much power will Uzbekistan's new power plant provide?

This new plant will have capacity equivalent to 8% of Uzbekistan's total generation capability and will be able to meet 15% of the country's overall power demand when complete.

Who is responsible for power plants & grids in Uzbekistan?

Thermal Power Plants JSC, Main Electric Networks of Uzbekistan JSC and Regional Electric Networks JSC are jointly responsible for the design, construction, installation and commissioning works in conjunction with the repair and maintenance of the main equipment and accessories of power plants and grids.

What will Uzbekistan's energy sector look like in 2035?

President Shavkat Mirziyoyev was briefed on the implementation of tasks and new projects in Uzbekistan's energy sector. According to projections, electricity consumption is expected to reach 121 billion kilowatt-hours by 2035. To meet this demand, the country aims to increase the share of "green" energy in total generation to 54 percent by 2030.
