# **Vanadium flow battery in Cebu Philippines**

## Overview

---

What is vanadium flow battery technology?

Vanadium Flow Batteries use vanadium flow battery technology, a rechargeable flow battery technology that stores energy using the ability of vanadium to exist in solution in four different oxidation states. This property of vanadium allows it to produce batteries with.

How much does a vanadium flow battery cost?

“The battery pack portion of it is less than \$200/kWh. Power electronics and servicing over 15 to 20 years take the price up to roughly \$300/kWh. However, it would not be accurate to compare a vanadium flow battery cost alone to the cost of lithium battery plus power electronics and 15 to 20 years servicing.”.

How long does a vanadium flow battery last?

In fact, a single VFB will deliver 3x the lifetime throughput of a comparably-sized lithium battery. Learn how vanadium flow battery (VFB) systems provide safe, dependable and economic energy storage over 25 years with no degradation.

What is vanadium redox flow technology?

Self-contained and incredibly easy to deploy, they use proven vanadium redox flow technology to store energy in an aqueous solution that never degrades, even under continuous maximum power and depth of discharge cycling. Our technology is non-flammable, and requires little maintenance and upkeep.
