Victoria solar Panel Solar Plant

Overview

Is European energy launching a 58MW solar PV plant in Victoria?

European Energy has inaugurated a 58MW solar PV plant and started construction of its second project, a 106MW solar park, in Victoria.

Will a solar PV project help Victoria's energy security?

Knud Erik Andersen, CEO of European Energy, said the project will contribute to Victoria's energy security whilst adding that the company remains committed to the long-term future of Australia's clean energy market. Indeed, the company has another notable solar PV development, in Queensland.

When will a solar PV plant be built in Australia?

Construction on the solar PV plant started in the first half of 2024 and is scheduled to be operational in June 2025. Catriona McLeod, managing director of European Energy Australia, hailed the strength of the Australian renewable energy market, citing that it was "promising" for developers.

What is the Girgarre solar farm Victoria?

The completion of the Girgarre Solar Farm Victoria, a \$140 million renewable energy project in the heart of the state, is a major step forward in Australia's clean energy transition. Now generating electricity and feeding power into the national grid, the solar farm strengthens Victoria's shift toward locally produced, sustainable energy.
