

# West Africa Base Station Room Uninterruptible Power Supply Project

## Overview

---

What is the West African Power Pool (WAPP)?

One key initiative is the West African Power Pool (WAPP), which is helping boost energy electricity supply in 14 countries, benefiting 57 percent (more than 244 million people) of the population in West Africa.

What is an uninterruptible power supply?

An uninterruptible power supply is a device that has the ability to convert and control direct current (DC) energy to alternating current (AC) energy . UPS is a battery backup for PC, when the power goes off the UPS kicks in and continues to supply power for some period of time to the particular system.

How will WAPP contribute to the development of clean and affordable electricity?

This project will contribute to the promotion of the stable use of clean and affordable electricity in West Africa through WAPP, whose secretariat is located in Benin, by providing 14 WAPP countries with member utilities to improve capacity building in regional system and market operations.

Is universal electricity access a global challenge in Sub-Saharan Africa?

Achieving universal electricity access is a global challenge and an urgent priority in Sub-Saharan Africa. In Western and Central Africa, only 52 percent of the population had access to electricity in 2020.
