# What does KTL mean on a solar inverter

## Overview

---

What is a sun2000 KTL L1 inverter?

The Sun2000 KTL L1 inverters are a range of solar inverters produced by Huawei Technologies Co. Ltd, one of the manufacturers dominating the global inverter market. They are transformerless models with a maximum operating efficiency of 98.2%, reaching 98.4% depending on the model, and are intended for residential use.

What does KTL L1 mean?

It means that the Sun2000 KTL L1 Inverter is designed for residential purposes. The Sun2000 KTL L1 inverter, designed for residential use, applies to household rooftop grid-tied systems. This system is composed of PV strings, grid-tied solar inverters, AC switches, and power distribution units.

What is a solar inverter & how does it work?

The Sun2000 is a single-phase grid-tied inverter with a PV string that helps convert solar energy from DC power to AC power. The electricity generated will then feed into the power grid for household appliance use. This Huawei inverter has a separate model exclusive to Australia.

What does k mean on a sun2000 5kTL L1 inverter?

The number with "K" indicates the power level of the product. For example, if the product you buy is Sun2000 5KTL L1, it will have an output voltage of 5 kW. Three = This represents the topology of the inverter. The letter "TL" shows that it is a transformerless inverter. Four = This refers to the product's design code. Here, "L1" is "residential".

## What does KTL mean on a solar inverter

---

### SUN2000

The SUN2000 is a three-phase grid-tied PV string inverter that converts the DC power generated by PV strings into AC power and feeds the power into the power grid.
