.

How does a ups protect a device from sudden power failure?

An uninterruptible power supply (UPS) protects valuable devices from sudden power failures by providing backup power during power outages. This ensures a steady power supply to connected devices.

What happens if a power supply is interrupted?

When the mains supply is interrupted (accidental power failure), the UPS immediately supplies 220V AC power to the load by switching over and converting the inverter to keep the load working normally and protect the software and hardware of the load from damage.
