# Where to buy a home inverter and how big it should be

## Overview

---

How to choose the right power inverter for your home?

Choosing the right power inverter for your home involves understanding your power needs, selecting the right type and capacity, ensuring compatibility with a suitable battery, and paying attention to features and brand reliability. Inverter Store can also give a help for your selection.

How do I choose the right inverter size?

Here is our last bit of advice on how to select the correct inverter size: Check our inverter size chart. List all your appliances in the function of their power output. Apply our inverter size formula. Do not exceed 85% of your inverter's maximum power continuously. Oversize your inverter for extra appliances in the future.

What is a good inverter capacity for a house?

For houses, it is usually taken as 0.7. So, inverter capacity (VA) = Total power requirement (Watt)  $\div$  Power Factor Using the above example: Inverter capacity =  $430 \div 0.7 = 614$  VA So, you must look for an inverter of around 650 VA or a little more. It is always better to keep some margin to avoid overload.

What makes a good power inverter?

Good waveform quality prevents damage to appliances and ensures smooth operation. Choosing the right power inverter for your home involves understanding your power needs, selecting the right type and capacity, ensuring compatibility with a suitable battery, and paying attention to features and brand reliability.
