

# **Which one should I choose for single-glass or double-glass solar modules**

## Overview

---

Should you buy single glass or double glass solar panels?

If you are concerned about your budget and want to buy solar panels, then single glass panels are the best option for you. But if you are looking only for performance and efficiency and much worried about your budget, then double glass panels are waiting for you.

Why are double glass solar panels called double glass panels?

Double glass solar panels are named double glass panels because they have glass on both sides which produces a little more electricity and gives more efficiency than single glass panels. The reason of this increased efficiency is because of addition of glass in the back as a replacement of polymer sheet in case of single glass solar panels.

What are the advantages of single glass solar panels?

Single glass solar panels have these following advantages: Single glass solar panels are affordable and cheaper than double glass solar panels, therefore they are available in the market easily and more in quantity than double glass panels.

What are the advantages of double glass solar panels?

Double glass solar panels have the following advantages over single glass panels: Double glass solar panels have double glass which provides the solar panel with great defense power against severe weather conditions. They are resistant to high energy UV rays of sunlight and moisture which ensure their long-term durability and performance.
