

Wholesale bess storage system in Sweden

Overview

How many large-scale battery storage systems are there in Sweden?

14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region. Developer and optimiser Ingrid Capacity and energy storage owner-operator BW ESS have been working in partnership to deliver 14 large-scale BESS projects throughout Sweden's grid, situated in electricity price areas SE3 and SE4.

Does Sweden have a battery energy storage system?

Sweden has traditionally lagged behind continental Europe in Battery Energy Storage Systems (BESS) growth, but recent developments have propelled rapid expansion. Until 2022, only a few projects were launched, mainly supported by subsidies and specific storage needs.

Why is Bess important in Sweden?

Sweden's renewable energy sector continues to expand rapidly. In 2018, solar and wind energy accounted for just 13% of total electricity consumption, but this figure is projected to reach 40% by 2025. This shift significantly increases the value of energy flexibility, making BESS essential for balancing energy supply and demand.

How is Sweden's Bess market evolving?

Sweden's BESS market is evolving rapidly, fueled by increasing renewable energy penetration, rising electricity demand, and changes in market structures. While challenges exist, diversification across multiple energy markets and leveraging advanced trading strategies will be critical for maximising BESS profitability.
