# Wind power tower 5g base station construction

## Overview

---

How many 5G sites will China Tower build in 2022?

China Tower planned to build or retrofit about 2 million 5G sites between 2019 and 2022. An estimated 800,000 of these sites will adopt Huawei's 5G Power solution, eliminating 900 million kg in carbon emissions every year, helping to realize targets for green power grids for the 5G era.

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How much power does a mobile tower use?

It's predicted that the proportion of sites with more than five frequency bands will increase from 3 percent in 2016 to 45 percent by 2023. In a site with multiple frequencies, maximum power consumption for the whole mobile tower will exceed 10 kW. At 10 or more frequency bands, site power consumption surpasses 20 kW.

How to optimize base station deployment in 5G wireless networks?

In previous research on 5 G wireless networks, the optimization of base station deployment primarily relied on human expertise, simulation software, and algorithmic optimization.

## Wind power tower 5g base station construction
