## Overview

---

Can a 500W switch power supply be used for communication base stations?

Conferences > 2023 4th International Confer. In order to meet the high power and high stability requirements of communication base stations for power supply, this paper designs a dedicated 500W switch power supply for communication base stations.

What is a wireless telephone base station?

A wireless telephone base station communicates with a mobile or hand-held phone. For example, in a wireless telephone system, the signals from one or more mobile telephones in an area are received at a nearby base station, which then connects the call to the land-line network.

Can eGaN FETs be used for LTE wireless base station infrastructure?

frequency eGaN FETs for LTE wireless base station infrastructure is presented. The ET synchronous FET bootstrap supply is used. 20 MHz LTE envelope with a 7 dB peak-to-average power ratio (PAPR). diode. In this application, however, a different approach is Modern communication systems demand high data capacity and high speed.

What is a WLSP transistor?

Such devices, the EPC8000 series, are available as wafer level chip scaled packaged (WLSP) GaN transistors with the device pin-out show in Figure 1. A four-phase synchronous buck pulse-width modulated (PWM) topology is selected, as shown in figure 2. The power switches are EPC8010 eGaN FETs.
